

Replacement Cables for Any Configuration

Power harnesses

Camera extension cables

Pigtail, OBD-II, JBUS options

Any cable needed for non-warranty replacement.

Lost, cut, or worn out — if a FleetCam® power harness or camera cable needs to be swapped outside of a warranty claim, FTS carries the exact part for your setup.

From FleetCam Pro and Essential power kits to camera extension cables from 5 to 15 feet, every cable in the field is available as a direct replacement.

FleetCam Pro Power Harness

Replacement power harnesses for FleetCam Pro, in pigtail, OBD-II, or JBUS — or as the complete power kit with everything needed to reconnect power in the field.

FleetCam Essential Power Cables

Replacement power harnesses for FleetCam Essential, in pigtail, OBD-II, or JBUS — or as the complete power kit.

Video Input/Output Cable

Replacement video-in/out cable for FleetCam Pro's auxiliary camera or LCD monitor connection.

AHD Extension Cables

Extension cables for AHD cameras in 5', 9', and 15' lengths — for mounting a camera farther from the DVR than the standard run allows.

IPC Extension Cables

Extension cables for IP cameras in 5', 7', and 15' lengths, for mounting a camera run beyond the standard cable.

Fit, Not Guesswork

For configuration, training, or consulting handled by the FTS Professional Services team rather than an in-field installer — individually quoted, billed in \$200 increments.
