

Award-Winning AI Camera Solution

Gain fleet visibility, safety, and accountability with AI camera technology.
FleetCam AI is designed to help save lives and improve driver performance.

Livestream Multiple Cameras

Stream up to 5 cameras simultaneously to see what the driver sees.

Monitor Driver Behavior

Unsafe driving event clips are automatically uploaded for review by both drivers and fleet managers.

Coaching and Analytics

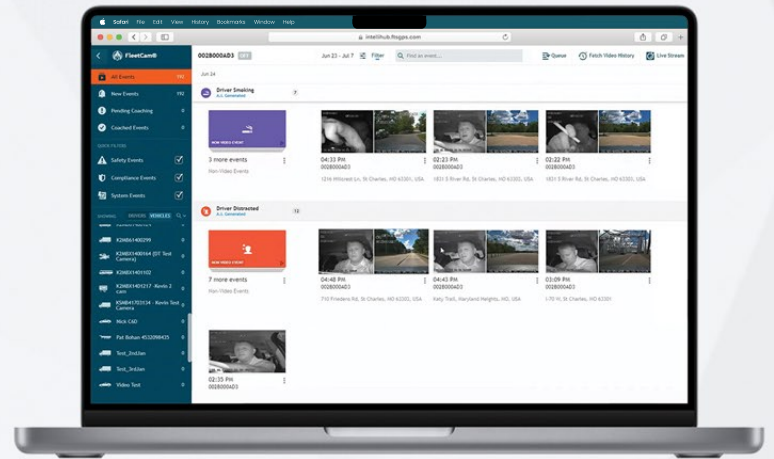

Automated driver coaching system, detailed analytics, and behavior pattern tracking.

FleetCam®

Award-Winning AI Camera Solution

All-In-One fleet vehicle camera system designed to save lives with AI driver assistance, in-cab notifications, and integrated driver behavior coaching

View Video History Remotely

Stream historical video and download clips right to a computer without having to physically access the vehicle.

Real-time In-Cab Alerts

In-cab audiovisual alerts help to prevent drivers from falling asleep, texting, smoking and more.

Improve Driver Reliability

Video monitoring encourages drivers to decrease risky behavior and improve reliability.

Driver Coaching System

FleetCam automates driver coaching with DriveShield™, an app built to let drivers see their events and self-coach.

Reduce Liability

See for yourself with HD video evidence—limit liability, protect drivers from false claims, and improve security.

Timelapse

Review footage 15x faster than ever before with timelapse.

Breadcrumb Trail Snapshots

Snapshot photos are captured every 5 minutes and displayed along the vehicle's route line (breadcrumb trail).

Increase Driver Satisfaction

Easily identify drivers who drive safely and efficiently when considering rewards and promotions.

AI Event Detection

FleetCam AI detects events such as lane departure, unsafe following distance, harsh braking, phone use, and more.
