

Tactile alerts that enhance driver awareness and safety

-  Multi-sensory alert system
-  Fully configurable events
-  Plug-and-play installation
-  Seat-mounted vibration alerts
-  Low-maintenance brushless design

Multi-Sensory Alert System

Combines with FleetCam V-Display audiovisual alerts to deliver layered warnings in high-noise or distracting environments.

Compact, Powerful Design

Small form factor with high-power vibration for discreet installation under or within driver seats.

Reliable Brushless Motor

Provides quiet, efficient performance and long operational life with minimal maintenance.

Plug-&-Play Connection

Connects directly to the FleetCam Hub via standard wiring harness for quick and simple set up.

Specification

Motor Type	Brushless DC (BLDC)	Dimensions	93.09mm (L) × 42mm (W)
Voltage Range	12-24V DC	Operating Temperature	-40°C to +85°C
