FleetCam® Pro LCD Display · FC-PRO-LCDC

The In-Cab View Your Drivers Need.

- Wide viewing angle
- Built for in-cab use
- Vibrant 7-inch display

Made for Round-the-Clock Cab Duty

Designed from the start for in-cab use: a monitor shade cuts glare in daylight, tilt adjustment puts the screen at the driver's eye line, and 450-nit brightness keeps the picture readable on the brightest routes.

A Picture Drivers Can Act On

The 7-inch TFT panel delivers an 800×480 picture with 500:1 contrast — clear enough to check a blind spot or confirm the cargo area at a glance, not squint at.

Visible from Any Seat Position

A 140° horizontal and 120° vertical viewing angle keeps the image legible even when the screen sits off-axis from the driver — no repositioning mid-shift.

Drops Into Your FleetCam System

Standard video input connects straight to the FleetCam Pro or Pro Hub — one cable for a live view of interior and exterior cameras.

FleetCam® Pro LCD Display · FC-PRO-LCDC

The FleetCam Pro LCD was designed with round-the-clock in-cab use in mind. Complete with a monitor shade and tilt-adjustment, this vibrant 7-inch display is the perfect companion for drivers to check blind spots and monitor cargo areas.

Specification

Display

Panel Type	TFT
Display Size	6.96″ (diagonal)
