

ELD Operator's Guide

49 CFR § 395.22(h) (1)

1. Login

To login, open the Field Warrior® app and enter your login credentials. Once you are logged in, a co-driver can login by opening the menu  drawer and selecting Co-Driver Login.

2. Hours of Service Screen

The Hours of Service screen is the central screen of the ELD. From here you can set your duty status, see elapsed and remaining time, and manage your logs.

3. Select Duty Status

Tap one of the duty status buttons above the graph to set it as your current status. If the vehicle starts moving before you set the status to Driving, Field Warrior® will automatically set your status to Driving. Once the vehicle has stopped moving for 5 minutes, Field Warrior® will automatically switch from Driving to On Duty, but first it will display a message allowing you to stay in the Driving status.

4. Hours of Service Graph

The Hours of Service Graph displays your logs visually for the current 24-hour period. You can choose a different day by selecting it from the bottom of the graph.

5. Countdown Timers

Countdown timers show you how much time is left in Driving and On-Duty. The timers will turn red when you get close to their limits.

6. Action Buttons

The driver card contains action buttons that allow you to manage your logs:

-  **Switch Drivers** - Set the co-driver as the active driver.
-  **Manage Shipments** - Add or Edit Shipping Records.
-  **Manage Logs** - View, Edit, and Certify logs for the past 7/8 days.
-  **Send Report to FMCSA** - Send a copy of your logs via Email or Web Services.
-  **Inspection Mode** - Reports showing all events for the past 7/8 days.

7. Driver Vehicle Inspection Report (DVIR)

Select New DVIR from the menu drawer.  Then, choose Pre-Trip or Post-Trip for a vehicle or trailer.

8. Add Shipment Doc.

View and add shipment info by tapping the shipments  button on the Hours of Service screen. Tap the  plus button to add a new shipment. A shipment record must include a shipping document number and a date-range during which the shipment will apply.

9. View & Edit Logs

View, edit, certify, and annotate logs by opening the menu  drawer and selecting Manage my Logs. This will display all logs for the past 7/8 days.

To edit a log, tap the 3-dot menu icon  and select Edit Log. Note: You cannot edit the start time of an automatically-generated duty status log (auto-switch between On-Duty and Driving).

10. Certify Your Logs

To certify your logs, open the menu drawer  and select Manage my Logs. Then, press the Certify button on the footer of the chosen day, and choose Agree when prompted to confirm.

11. Claim Unidentified Logs

If vehicle movement is detected while no driver is logged-in to Field Warrior®, or a malfunction prevents the driver from being identified, the unidentified logs will be captured and presented to you upon login. You must then claim or reject that activity as yours.

12. Accept / Reject Manager's Log Edits

A manager can edit your logs using IntelliHub®, but those edits will not affect your logs unless you choose to accept them. To accept or reject the changes, select Manage my Logs  from the menu  drawer, and tap the log to expand it. You can accept or reject changes individually.

ELD Data Transfer Instructions

49 CFR § 395.22(h) (2)

A. Inspection Mode

This screen shows a report for each 24-hour period. If there is unidentified driving time, an additional report will be displayed as Unidentified Driver. Each report contains an overview section, an Hours of Service graph, and a list of all event logs for the day.

B. Send Report to FMCSA

To send your driver logs to the FMCSA, open the menu drawer  and select Send Report to FMCSA. Then, choose Email or Web Services. A comment can be added to the exported file. Your driver logs will be sent directly to the FMCSA for review and compliance purpose. This does not create a copy or backup of your logs

ELD Malfunctions & Diagnostics Guide

49 CFR § 395.22(h) (3)

In the event of an ELD malfunction, Field Warrior® will notify you with an alert. If this happens or if the ELD gets damaged, please follow these steps:

1. Notify your manager/carrier of the malfunction in writing within 24 hours.

2. Switch to graph-grid paper logs that comply with 395.8.

3. Reconstruct your logs for the current 24 hour period.

If you cannot access your logs for the past 7/8 days in Field Warrior®, you must reconstruct those logs on paper as well. In this situation, we recommend that you contact your manager and request a copy of your Hours of Service report from IntelliHub® (web portal).

You are not allowed to continue using paper logs for more than 8 days after the malfunction. However, your carrier can file for an extension from the FMCSA. If an extension is granted, you must be able to show proof during a roadside inspection.
